

All new Rapido Trail model!

# RAPIDO 125

In two hot new models

The 1969 Rapido is loaded with surprises. On a longer wheelbase, the re-styled tank and seat provide improved comfort and better overall balance. The new speedometer, Sprint-type grips and ball-end hand levers are all part of a fresh new look up top. The Rapido Trail version also boasts a high pipe with

perforated heat shield, large sprocket and special turf-grabbing rear tire. Here's off-road action that'll turn out the crowds and turn in the winning performance. This is the bike they'll be talking about again this year. Why don't you get in on the conversation. In Radiant Blue, Jet Fire Orange or Midnight Black.
